

APPENDIX B
SUPERVISOR REPORT FORM

Prepared By:
Malaysian Gastroenterology & Hepatology Training Committee

SUPERVISOR REPORT

Elements of Competence to be Assessed

1. Patient care

Trainees must be able to carry out the following:

- Provide patient care that is appropriate, effective and compassionate.
- Arrive at an appropriate differential diagnosis based on history, examination and investigations
- Formulate a plan for management and follow-up
- Demonstrate procedural skills essential for the practice of gastroenterology and hepatology.

2. Medical knowledge

- Trainees must demonstrate a core fund of knowledge in gastroenterological and hepatic physiology, pathophysiology, clinical pharmacology, radiology, and surgery

3. Self directed learning

- Trainees must be able to investigate, evaluate, and improve their patient care practice by analyzing and assimilating both scientific evidence as well as their own prior experience into their practices.
- Should be able to critically appraise clinical studies and be able to use information technology to support their own education.
- Show commitment in increasing their knowledge through CME programmes, presentations, conferences and workshops
-

4. Interpersonal and communication skills

- Trainees must be able to demonstrate interpersonal and communication skills that result in effective information exchange with their patients, families, and other health care professionals.
- Trainees must be able to work effectively as members and leaders of the health care team

5. Professionalism

- Trainees must demonstrate an understanding of and commitment to all elements of professionalism, including respect, compassion and integrity toward their patients, patient families, and other health care professionals.
- They must demonstrate ethical behavior, responsiveness, and sensitivity to a diverse gender, ethnic, socioeconomic, and aging patient population.

6. Systems-based practice

- Trainees must demonstrate an understanding of, awareness of, and responsiveness to the larger context and system of health care delivery.
- They should be able to practice cost effective health care, avoid excessive costs and over investigation without compromising quality of care for their patients.
- The trainee should be able to liaise with other health care providers to provide the optimal care for his/her patient
